AutoCAD is designed to help users draw, view, annotate, and manipulate 2D and 3D designs. AutoCAD has a broad range of features that include drafting, measuring, designing, rendering, analyzing, printing, estimating, and collaboration capabilities. Because of its range of features, AutoCAD is offered as part of a suite of applications from Autodesk. This package is referred to as AutoCAD 2016 by Autodesk and is available with the Productivity Edition at $4,200 and Professional Edition at $5,100. AutoCAD Versions and Licensing The AutoCAD product is available in three editions, Professional, Standard, and Student. Professional and Standard edition users can pay to upgrade from the previous year's product at no additional charge. AutoCAD for Mac is licensed as a perpetual license. The license fee is $3,000. AutoCAD for iOS devices (iPhone, iPad, iPod touch) and Android tablets is available as a perpetual license for $3,000. AutoCAD for Mobile and Web is licensed as a perpetual license for $4,000. Lack of AutoCAD for Android licensing, as of January 2017, may be due to technical problems related to Google's new licensing structure for the Android operating system. Note: A majority of AutoCAD users are hobbyists and are interested in educational and/or training programs only. The Professional and Standard editions are designed for users with business needs. Students can use the Student edition. Students typically use the AutoCAD Student edition. To purchase a license for AutoCAD Student Edition, a student may use either Academic or Educational. For Academic, the student needs to supply a credit card, while for Educational, the student needs to have a school credit card, i.e. VISA or MasterCard. A student will have a pro-rata share of the usage fees for a one-user license of AutoCAD. The pro-rata share is based on the number of days of actual use of the AutoCAD license. One important thing to note when purchasing AutoCAD is that the software will be installed on your user's computer. AutoCAD is not available on cloud computing systems such as Google
