Although not supported by the latest releases, it is still possible to use Python scripting within AutoCAD. This can be done through the Python interpreter found in the program menu. Versions AutoCAD 2017 and AutoCAD LT 2017, for both Windows and macOS, supported versions of AutoLISP. With AutoLISP 2016, it was possible to utilize this language within AutoCAD's DirectDraw Interface (DDI). AutoLISP 2007 was available in AutoCAD 2008. AutoLISP 2007 introduced the 'C++ Interface' to the programming language which made it possible to extend Autodesk products with AutoCAD functionality. However, as of AutoLISP 2007, the 'C++ Interface' was not supported by AutoCAD 2008 and later. AutoLISP 2007 was an extension of Visual LISP and therefore it was possible to program both within AutoCAD and Visual LISP. AutoLISP 2011 was introduced in AutoCAD 2010. AutoLISP 2011 introduced a new 'C++ Interface', which allowed AutoCAD 2011 and later to support the 'C++ Interface' in AutoLISP. AutoLISP 2012 was introduced in AutoCAD 2012. AutoLISP 2012 introduced 'C++ Interface', which allowed extension of AutoCAD 2012 with new functionality. AutoLISP 2013 was introduced in AutoCAD 2013. AutoLISP 2013 introduced support for C# programming. AutoLISP 2015 was introduced in AutoCAD 2014. AutoLISP 2015 introduced 'C++ Interface', which allowed extension of AutoCAD 2014 with new functionality. AutoLISP 2016 was introduced in AutoCAD 2016. AutoLISP 2016 introduced 'C++ Interface' which allowed extension of AutoCAD 2016 with new functionality. AutoLISP 2017 was introduced in AutoCAD 2017. Languages and APIs AutoCAD's programming languages are: AutoLISP – a proprietary language supported for the latest AutoCAD releases. Visual LISP – a proprietary language supported for the latest AutoCAD releases. VBA – a proprietary language supported for the latest AutoCAD releases. .NET – a proprietary language supported for the latest AutoCAD releases. What's New In?

Collaboration has never been easier. Import a template of a shared drawing with any browser-enabled device, and change it in minutes. Rapid design creation and collaboration. With Dynamic Input, you can create input objects automatically in response to changes in your drawing. Overlay blocks, shapes, and lines. Combine your blocks into a single block in an easy-to-read, centralized location. Smart guides with dynamic borders. Move your guides around your drawing so they are always where you need them. Batch Edit: Edit models and pages at once. Use Batch Edit to batch-update multiple drawings simultaneously. Save, reload, or revert a large number of drawings. Combine your edits and reload drawings to reduce the storage space needed to keep track of what you did. Reduce the number of desktops you have open. No more juggling multiple applications to locate files you want to open. A single application—AutoCAD—opens files at a single location. Make it easy to open, close, or reopen files. Find a drawing quickly. AutoCAD has indexed all your drawings and allows you to search them to find specific documents. Overlay: Overlays and right-click menus: Overlays are the fastest way to add content to your drawings. Just right-click on an overlay (object) to open its context menu and add content. Create a custom right-click menu. Specify a text, icon, or line, and assign it a context menu action. Track overlays as you move them. Use the Tracker to draw a line on an object so you know where it will be. Drag and drop to move objects. Drag a block or line directly to a specific spot on an object. Match your drawing: Make duplicate drawings from your existing drawings by copying specific objects. You can even edit the source file and let AutoCAD take care of the rest. 3D View: 3D views: With 3D views, you can easily see how a drawing fits into a 3D space. Now you can view 2D and 3D drawings in a single view. 3D View Panorama: View more than two drawings side by side in the same 3D view. Easily compare, align, and merge drawings into 3D models
