Trail of the Azure King Game Overview Trail of the Azure King is the solo adventure that began with my 1998 D&D-inspired board game, The Waterman. I've adapted the rules to keep things simple, and expanded the world of The Waterman's village and fen-lands, creating many new areas to explore and dozens of new characters to play. Trail of the Azure King is the board game that I made to support my D&D-inspired solo RPG adventures. All the needed adventure material is included. The Waterman The Waterman was my first board game. It followed the adventures of a Viking-like hero named Fingar who had been chosen by the people of the fenlands to be the Waterman. He was to lead the people into a new age. But first he had to discover the secret of the water which was the life source of the village and the people. In The Waterman, Fingar had to travel around the fenland searching for water springs. He had to find the three Azurites - King's Stones - to gain the help of the gods and to solve the mystery of the water. Along the way he had to face many dangers, including the threat of an ancient evil, who was trying to stop him. The Waterman is a board game that was a parody of the Dragonlance books and a tribute to the early D&D players. I had intended to release Trail of the Azure King as a board game, but I decided to make the final product a D&D-inspired solo RPG adventure. This has many advantages: I can give the game away as a free download; I can use the game material to create new D&D adventures that I can give away; I can make Trail of the Azure King freely accessible to the online role
