## **BoneCraft + Rage 2 Cheat Codes**

**Download**

---

Pk-Puyo Cheats. Sonic The Hedgehog PC Cheats Codes. That's my 6 month old project I'm still trying to get this thing to work 100%. Can you still save your game files? Press 'A' and 'B' and you should see a menu: select save game file type and press 'a' on keyboard. Press A to access the main menu. Note: the trainer will show the name of your save games as default name. If you have multiples you can change it. The trainer also has two options: Load save games (back up the old save and load them in the new trainer) and Delete save games (back up

---

the save and delete it). They are located in the lower left corner of the window. For the rest, you can disable cheats. General Settings has the most options if you want to use cheats. Training Mode is to train your in game stats on how to play the game. Other has options to see the trainer help window (which I can't show since it's just a single empty box). Trainer Options has all the options you'd think to have. Games tab have more options. Download Games tab have options for how many trainers will install. When the trainer is successful installed you can find them in the

---

download section. It's done through the Locate Data button on the main window. Note: you may need to restart the trainer afterwards. Once you find it, click the open button to start the installer. Then follow the instructions. To configure the trainer you need to open the Load Game folder by choosing Load Games option on the main window. Click the game you want to load and follow the instructions. Each trainer need a game file. The trainer automatically generated the game file using the save game file you selected. If it generates a new one, you can go back and select the

---

old one. While you're in the game, press A to access the main menu. Then look for an option that says, "Menu", and press A on the keyboard. Look for other options that says, "Options". These are all the options you'd think to have, they are all explained below. Cheats is what you will use to disable/enable cheats. Once you have selected a cheats code, press A on the keyboard to access the main menu, go to the help, and scroll down to cheats. Use the up/down keys to select a cheats code. You can have up
