A technology has been created that potentially can deliver high-definition (HD) coronary imaging at the coronary bifurcation. The purpose of this article is to review this new imaging modality, compare it to current imaging modalities, discuss its indications and limitations, and evaluate its applications. A new imaging technology is described, which is capable of simultaneously imaging the coronary lumen, plaque, and tissue components over a wide bifurcation. An estimated 4 billion US dollars is being invested in the HD multidetector CT technology that may lead to a major impact in the clinical practice. The field of coronary artery imaging has undergone a major metamorphosis with the introduction of this technology. The limits of this technology and its implications for coronary research, diagnosis, and therapy are highlighted.Q: Simple battery monitor (instructions please!) This is my first post so I am new to stackoverflow. I would like to make a simple battery monitor in python. I would like to be able to list out the phone's battery level (or the phone's charging status) into a dropdown menu. I was wondering if there are any suggestions for what I should do and what libs are good to use? (I am not that experienced with python so I am not sure if there are any useful libs available or if I should start from scratch). I have looked into Menus, Dialogs, Choices, PyModules, Tkinter, WxPython, PyGTK, etc. and not a lot of them seem to have dropdowns. A: Use tkinter and the Widget options. Somewhere in
