Mettle FreeForm Pro [ V.2.0, ShapeShifter, AE X64, 2011, ENG ].torrent.1. Field of the Invention The present invention relates to a liquid discharging head which discharges a liquid by generating a pressure to discharge the liquid, and an image forming apparatus including the liquid discharging head. 2. Description of the Related Art As an image forming apparatus (a printer, a facsimile machine, a copier, a plotter, or a multi-function printer including at least one of these functions), an inkjet recording apparatus is known in the related art which includes a recording head (a liquid discharging head) including a flow path communicated with a discharge port to discharge a liquid, and an actuator which drives the recording head. In the inkjet recording apparatus, an ink cartridge which supplies the ink to the recording head is mounted in the apparatus and the ink is supplied from the ink cartridge to the recording head. A conventional inkjet recording apparatus of the related art is provided with a body case, a nozzle row which is stacked in the body case, and a support frame which supports the nozzle row and which is installed in the body case and is provided with an ink supply path for guiding ink to the nozzle row. Further, a pressure generating chamber which communicates with the ink supply path is provided in each of the nozzles which are arranged in the nozzle row and liquid paths are formed in each of the pressure generating chambers. Further, each of the liquid paths includes an ink supply port which supplies ink to the pressure generating chamber, and an ink discharge port through which the ink supplied to the pressure generating chamber is discharged. The support frame is provided with a liquid flow path of the ink which is filled with the ink, a liquid pressure chamber communicated with the liquid flow path, and a pressure generating element which is installed in the liquid pressure chamber and which applies a pressure to the ink filled in the liquid flow path. Further, an ink supply path which supplies the ink to the liquid flow path from the ink cartridge is formed in the support frame. In the related-art inkjet recording apparatus, when a user mounts the ink cartridge in a cartridge mounting portion of the body case and the user actuates an operation lever, the operation lever provided on the ink cartridge is guided toward a cartridge mounting portion of the body case by a guide portion formed in the ink cartridge. At this time, the ink cartridge is engaged with an engagement portion provided in the cartridge 3e33713323
