Metastasis is a complex multistep process which requires coordination of the tumor cell to endothelial cell interactions, detachment from primary tumor cells, migration through the interstitial matrix, and tumor cell invasion. In addition to known metastasis-promoting ligands, such as vitronectin, fibronectin, laminin, and collagen type IV, the adhesive interactions between tumor cells and endothelial cells are mediated by a unique group of heterodimeric adhesion molecules, the integrins. "I think 'patriot' is somebody who knows that there is no country without immigrants. That there is no country without people who come from other countries to live here. That is an American value and I have never felt, not for one minute, that I am anything other than an American patriot." Stephanopoulos also asked Clinton about

Donald Trump's suggestion that President Barack Obama was not born in the United States. "He says a lot of things," Clinton said, adding that she and her allies are "working overtime to make sure that what he says is used as a bludgeon." "We're going to get a Republican Congress to stand up to this president, who will be seeking a second term in office," she said. "We're going to have him defend those comments and we're going
