Karyuen, the business-class application that aims to streamline your life by automating it! A beautiful and futuristic UI, e-mail support, Facebook-like update, and even more have been packed into Karyuen. Let's see what it offers for you. Karyuen's interface and features Karyuen is a business application that simplifies your life by automating it, but that doesn't mean you need to know everything. In fact, this is a minimalist UI that makes it more approachable. It doesn't feature an icon, just a line of text that says "Karyuen, your business ally". When launched, Karyuen offers the following features: Scheduling tasks Take notes, send email, schedule tasks and more from the same place. Web browser Karyuen features a built-in web browser with a very organized interface. You can access various services, like Facebook, or a site's contact. E-mail support Karyuen supports multiple e-mail accounts, providing a comprehensive address book of addresses. It also keeps a history of every email you have received. Tasks Keep track of your tasks, save them and reschedule them. Mark todo list as completed. Access and share your tasks. Get more tasks on Karyuen Karyuen supports various methods of sharing your tasks to other applications or websites. There are 2 different type of tasks: basic tasks and important tasks. Both are synced with the cloud, but the latter is available only from within the app. Tasks can be tagged and connected to a particular event or project. It's a great way to group your tasks, or to structure them in multiple subcategories. Import tasks from popular services If you use services like Gmail or Facebook, you can import your tasks from them. Web integration Karyuen integrates with services like Twitter, Facebook, LinkedIn, Last.fm, GitHub, and many more. Social features The social features include the ability to add comments to tasks, receive comments from other users, and comment and rate your friends' tasks. To get more tasks on Karyuen, you can use the search feature or invite people by inviting them on a task. You can even create a checklist to mark the tasks that you want to complete,
