Win32 API Disassembler .NET Sourcecode *x86 Apr 1, 2012 .NET Sourcecode Reader w32dasm Version 8.5 W32DASM - Disassembler A: Tinyassembler It uses .NET Reflector to read and disassemble managed source-code. I've found this to be extremely handy in debugging mixed-language (i.e., Windows API, .NET and COM) source-code. It provides a novel interface to .NET Reflector making navigation through the code simpler than with Reflector alone. See this link for more information. A: I know this is an old question, but I recently discovered .Net Disassembler and it's also free. I don't have any experience with it. It says it can disassemble C#, VB.Net, F#, C#, and also have a disassembler for java. It also has a memory viewer with a 'bad code' color scheme that was very useful when debugging win32 applications. [Photo Credit] David Crowe is the designer of the now iconic Miata. He's also the designer of the new Miata Nurburgring Edition as the new 2012 Miata is now being called. Showing off just a bit of his Nurburgring credentials, David went and tested his new Miata at the legendary German track's Nordschleife. In the video David really shows how smooth and how comfortable the new Miata is. Although, he does have a few setbacks. First off, when David went to turn in the driver's side it doesn't turn in, it feels like a plane going down. The crash video is just as bad. You really do feel the crash and the force from the impact. David does get out of the car but it looks like the body is twisted. [Video Credits] Zagury/Neon Communication and Nico Adams. The new 2012 Miata will debut during the 2012 New York Auto Show and is scheduled to go on sale sometime at the end of the year. The Nurburgring Edition will cost around \$40,000 with an MSRP of \$26,200. If you can't afford the \$40,000 though
