What's New in the TubeOhm ANTI TRANSPIRANT?

Featuring high-resolution oscillators, the 16-Voice, 64-Step sequencer and delay time of up to 582ms, TubeOhm ANTI TRANSPIRANT will satisfy even the most demanding of users. TubeOhm ANTI TRANSPIRANT comes with 6 completely new presets (in both English and German) that were designed to suit guitarists and vocalists. Besides, we have included 7 preset banks and a total of 15 users presets. TubeOhm CYCLER GUI Description: TubeOhm CYCLER GUI is designed as a set of six percussive instruments for guitarists and bassists, whose key feature is the ability to modify the player's sounds based on the performance performed by the player. TubeOhm CYCLER GUI, along with the TO STEPPER 16 P, come with an expert group of sound designers who have been working on their own own electronic instruments based on these concepts. The sounds of TubeOhm CYCLER GUI have been developed taking into consideration the fact that these instruments have a double purpose: they can be used in different musical genres, such as: Electronic, Experimental music, Progressive, Hard Rock, Noise, Hip Hop, etc. TubeOhm CYCLER GUI is both a stand-alone virtual instrument and a complement to TO STEPPER 16 P. TubeOhm CYCLER GUI comes with a set of six percussive instruments based on the concept of "cyclic modification". TubeOhm CYCLER GUI includes: 1. TubeOhm CYCLER GUI [PLAIN], which allows you to process and modify the performance performed by the user on the guitar. 2. TubeOhm CYCLER GUI [DOUBLE], which allows you to double the volume level of the sound selected by the user. 3. TubeOhm CYCLER GUI [WHIP], which allows you to quickly modulate the selected sound and, in particular, by wagging the guitar, you can change the modulation of the sound with respect to the position of the player's hands. 4. TubeOhm CYCLER GUI [POLYPHONIC], which allows you to easily create interesting polyphonic sounds. 5. TubeOhm CYCLER GUI [SQ], which allows you to modulate the sound and, in particular, by fiddling with the shapes of the sounds, you can easily perform functions such as spectral shaping
