PruneDroid is an easy to use and powerful prune tree management tool that works on iOS devices. It can be used to prune, thin, merge, search, re-sort, refresh, maintain and export branches. It also has a level of security that requires users to login before they can delete any branch, plus they can only see branches they are allowed to view. PruneDroid allows you to:

- Clean up dormant/orphaned branches of your tree.
- Remove branch that contains no leave or resource nodes.
- Prune a merged branch.
- Merge multiple branches into single branch.
- Merge branches with a specific view type.
- Sort your tree by string value.
- Refresh your tree, check for orphaned/dormant branches and check for merge errors.
- Export tree as html/pdf file.
- Import tree from html/pdf file.
- Import tree from CSV, XLS and JSON file.

PhotoWiz Serial Number Full Torrent Free Download
