What's New in the?

This is a registry patch that will restore the changes from your system registry, that caused the infection by I-Worm.Navidad. The main goal is to recover the entries that have been edited on your system in order to delete I-Worm.Navidad from your system. So, it doesn't remove the malware from your computer, but it will remove some malicious entries that this infection has created in your system. After this restoration, your computer should be as it was before the infection. It will make your computer immune against further Navidad infections, and that's why the method can be called anti-Navidad. In addition, it will perform a full system scan, so it will find all the possible Navidad infections and delete them. From the information we get, we can

see that Anti-Navidad is currently not able to prevent other malicious programs from modifying your system. The reason is that Anti-Navidad uses its own registry editor, so it doesn't automatically read the registry entries of other programs. So, there's a chance that you will see the same modifications when you reinstall other programs on your system, but that won't cause any problem, because these changes are not caused by Navidad itself. Anti-Navidad works on systems with Windows 95/98/ME/NT/2000/XP/Vista/7 and 8/8.1. So, if you are using one of these systems, then there's no need to download the Anti-Navidad manually. It is already included into the Anti-Navidad System. Anti-Navidad comes in the form of a.zip file. The files inside the archive: Anti-Navidad_Critical.exe is the main program, which is the registry patch. Anti-Navidad_Setup.exe is the setup program, which has a cleaner that it's going to use in the next step. Anti-

Navidad_Registration_Tool.exe is the backup tool, which it's going to use if something goes wrong in the installation process. Anti-Navidad_Regions_Fix.reg is the file that you have to merge in order to restore the changes from the registry of your computer. Anti-Navidad_Regions_Recover_From_Registry.reg is the second file that you have to merge in order to restore the changes from the registry of your computer. Anti-Navidad_Schedules.txt is the file that contains information about when to perform the registry changes. Here is how Anti-Navidad starts: After the installation process is completed, just close Anti-Navidad, and you are done. As you can see, there's a lot of files in the installation archive. Anti-
