

Apple added Picture-in-Picture (PIP) mode to iPad with iOS 13. This feature was added to iPhone shortly after with the release of iOS 14. Feature Picture-in-Picture allows you to view videos and web pages without closing the main application you are working in. The iPhone X was the first model to have this feature last year. However, Apple only brought PIP to the iPad this summer with the release of iOS 13. In iOS 13, PIP functionality has been integrated into the Videos app, where you can watch any video. You can also watch videos in the background while browsing the web in Safari.
