ENDURE With Full Keygen Free [32|64bit]

We've come up with a simple mechanic for this game. Choose a difficulty and a speed. In each round you'll get 1 action to fill, and the object is to get through the game with less points than the difficulty. If you reach this condition at the end of the game, the player has lost. So the higher the difficulty and the faster the game, the greater the risk of loosing. As you play the game you will encounter obstacles and traps which will cause you to earn more or lose some points. There are also bonus challenges which will cause the speed to increase. The game does not include win conditions or options to save the progress. However the game does allow you to share the game via the web. We have a page on our website where you can upload your game and send it to us (email is not supported). We'll share your game with our friends and also our friends will be able to play it in your browser. We are very excited about the game and it is our first game for ios. We hope you enjoy it!
