Chess is the classic game about strategy, and in the "Littlestar", a man can enjoy the thrill with his or her partner. "Littlestar" is a game for two players that uses only a board and a single chess piece, but big fun can be enjoyed in battle!

Two players face each other with "Littlestars". If the player who places the first one wins, they gain a certain point and can use it for position set-up on the game board, aiming to place your Littlestar at the most advantageous position. If the second player's Littlestar wins, they gain back the base point set-up and it is a turnaround game for a player. Different from most of the chess-themed games, there are two troops making their plays constantly, preventing a draw.

9 Simple Gaming Tips You Should Have Known Since Day 1 Battletoads, it's the big one this week. GameCritics.org's own Kerbs Evans offers up 9 tips that he wishes he knew when he was gaming like a boss. I'd like to think that a player who cares about the craft of games would have a healthy respect for the people who make them. But that's probably wishful thinking. Worse, I'd like to think that a gamer wouldn't want to belittle the work of those who make games, not even if the people have made fewer games and garnered less respect than they deserve. But I've been in the trenches long enough to notice a few things about what you don't see in a lot of coverage of games: the people who make the games you play and the people who make the games that people play. When you make it about the games or the mechanics, you miss the people, and sometimes it's someone you're trying to convince that making games is a worthwhile career. Maybe you don't have time or money to make games, but you enjoy them and feel that your time and talents are well-suited to telling others about the world inside the games, and you don't mind being the forum for stories, fan art, and more that relate the games to people outside of the games and places where you play them. I'd like to think you know how to do that by now. So what are these nine simple gaming tips? 1. Know what you want. "Games are for playing." That's the mantra. Lots of games are interesting, but they're of limited use if you aren't clear in your own mind about why you play them and what you enjoy about them. You'll know where you want to go when you've figured out what you want. 2. Play the right game. In most cases, you'll find that the games that you enjoy most can be played for a variety of reasons. They may reflect your interests, reflect your strengths and weaknesses, or be fun and relaxing. That's a good reason to play more than one kind of game. There are also games that you will enjoy, at least at one time
