Simply click on the button below and start rating the releases you are interested in.Q: Run a function when browser is running Is there a way to run a specific function when the browser window is active? i.e. if the browser window is active, run functionA, if the browser is inactive, run functionB. A: There are two parts to this question: How to detect whether the browser window is active (or not) How to run a function when the browser window is active Both of those have been answered on StackOverflow. To detect whether the browser window is active: Detect if a window is open or closed in JavaScript For the second part (i.e. running a function when the browser window is active): Capture focus of active window when browser loads Here's an example of a web page (using JavaScript) that loads when the browser is active that captures the focus of the active browser window. NEW DELHI: A Jawaharlal Nehru University student, who had been accused of sexual harassment by a JNU staffer, filed a police complaint on Monday alleging that he was a victim of a planned conspiracy hatched by the woman against him.The complainant, who was earlier named as Shehla Rashid and has since been changed to Qamar-ul-Hasnat, filed the complaint at the Oshiwara police station in Mumbai on the basis of a

written statement he obtained from the accused woman, said senior investigating officer (SI) of Oshiwara police station, Ashok Falke. He said the woman, who was a student with the complainant when the case occurred, has been arrested and has confessed to the crime."We have forwarded the case to the court," he
