Nemesys warns, I'm not making this game. In the year 2166, humans are at war with the Neverborn, a group of vicious monsters whose first appearance was to raid planets for the core material used to power their fleet of war machines. Human resistance rose after the invaders visited Nemesys, a tranquil and borderless planet where the environment has remained at peace. You're part of a special group of soldiers taking part in an experimental project called the Cactus Clan. Led by Phillip Maddix and his son John Maddix, this unit exists to launch a counter-strike against the Neverborn by abducting enemies from the black voids and bringing them to Nemesys for study. In the past this has proven to be a successful strategy; however, their success has resulted in the loss of many other lives. As the first squad member, you are also responsible for aiding both Phillip and John in all their planning. However, you are the last of the Clan's leaders. No other cactus soldiers can remember their past. Nemesys is a fictional universe developed by Nippon Ichi Software in collaboration with top Japanese illustrators. This brand new project from NISA uses Visual Novel game technology to allow players to experience the game in rich ways with the use of data applied to the world. This allows players to enjoy unique scenarios that provide an emotional atmosphere and are supported by original illustrations. In Nemesys, you are Phillip Maddix, leader of the Cactus Clan. Nemesys, a peaceful borderless world, has been infected by enemy forces. Now you have been selected as the leader of an experimental unit whose main mission is to abduct enemies from the never-ending black voids and bring them to this planet for study. In order to fulfill this mission, you will encounter new characters along your journey. Find out about each of your clan members' pasts and about how each of your decisions will impact their future. In this adventure, you'll visit the different areas that make up the world of Nemesys. This was only intended to be a short post-apocalyptic world, but has been enjoyed so much that it has now turned into a full-fledged universe filled with countless stories. Some of these stories have already been told, but others are still waiting for their hero to arrive to begin their journey. You can explore the world of Nemesys as you see fit. **I finally decided to try my hand at a Random Coloring Game, and I'm not sure what I thought was going to happen. I planned to make it like a pastel Angry Birds kind of thing, but it turned into a coloring book! The story is simple: Every day, a giant pink jellyfish lurks in the city waters. They stung hundreds of people that day, and the mayor makes a decree that the Jellyfish must be destroyed! The residents of the cities banded together in a search party with Teddy the Dummy Cat, a space man down on his luck named Mr. Merkle, and an actual, live, feline friend named Jack. Little City is a game for you and your kids because it is just like being in a coloring book with all the characters in the city and different obstacles to steer you around. Download the game How to Play: Download, unzip, and run the game Enjoy the game! FAQ: Q: When is it coming? A: When I have time to do it, and I will! Q: When is your other game coming? A: FLING! When I update my code in Visual Studio by giving it a new build number and refreshing, I have to redeploy my application. This normally causes the.exe to be replaced and any ClickOnce files will be removed along with the old.exe. This means that my users will have to redownload my whole application and extract it again. Relevant offers The video shot by a motorcyclist of a fleeing dog that can be heard shrieking in pain and wailing has caused a stir in the South Island. Nelson City Council told Stuff the footage shot by Andrew Campbell, from Blenheim, and emailed to them on Wednesday, was good quality and clearly showed a dog in pain. "The dog can be heard howling and yelping and there can be glimpses of its body," a council spokesman said. "It appeared to be very distressed at the time of the incident." The dog was with an owner around the district nursing association car park at the corner of Colombo and Waiopehu streets on Wednesday morning. The owner has spoken to the council. The footage shows the owner chasing a dog across a car park to the browns where he tried to corral it into a half-buried, grassy area. The dog can be seen yelping and fleeing through the maze of green grass, scurrying around a watering bowl as he runs. "The dog continues running around in the area for some time with the owner closely following before he drags the dog over to the browns, where the dog is in obvious distress. The dog appears not to have any control over its body and its legs are in the air. The owner then appears to back up and the dog limps off into the bush." The council has been in contact with the office of Environment Minister Richard Butler, who had not heard of the incident but said it was an animal cruelty issue. "It's definitely illegal not to catch an animal and obviously it's a very nasty, cruel act to leave the animal in
