This is the lore of our world brought to life! You are the king of the forest, charged with protecting your woodland home and the surrounding countryside from the incursion of bandits and monsters. This is the forest where you were born, made of life-like trees and haunted by the spirits of your ancestors. Game Features: - Explore three biomes with their own distinct challenges - Craft your own loadout of weapons - Energize your kingdom with stone and earthen walls - Place your houses and fences as you work towards creating your own kingdom - Build your own individualized roads through the forest and even aim to reach your neighbour's kingdom - Feed wild animals, prevent them from becoming aggressive or tame them to attack bandits - Fight your way across battlefields and seek refuge in other players' communities - Fight for the survival of your kin, your tribal society and the peace of your kingdom - Encounter a variety of enemies from 'mere' bandits to grimier monsters - Fight to keep the peace and work to defend your kingdom from ill-intentioned looters As the Cenarion Expedition enters the seventh stage, Kurt travels to the second moon of his subject planet Wythshire to complete a series of AI tests, but a mysterious disease is spreading from the surface. Kurt is the only scientist skilled enough to study the disease and stop it, but he won't be able to open up about the results unless he stays on the Moon for a year and tests to see if his findings can be replicated there. Cenarion Expedition now includes: - A new difficulty setting, AI Speed Limit, unique to the Moon. - A revamped Expedition progression system. - Cenarion Expedition's story has been split into two main parts for easier player progression. Kurt will now unlock his AI Specialist, Adrift, and his hard-coded AI script, Adrift Guardian, as he completes both his base and ISS modules. - The Time Distortion module will now be unlocked as Kurt completes his 'Finding a cure' story module. - The Modulation Module and Nanotube

Features: 4 weapons 20 levels of increasing difficulty Quick-reflex gameplay 1 missing girlfriend 1 anonymous messenger An explosive ending Compatible with all controllers Additional Notes: Multiplayer is still in early development - please help me make it great, using the beta and server option. This game uses.png for graphics, so that saves me some development time if more people want to play. Movement is broken when using the keyboard and WASD keys - again, it's being worked on. If anyone wants to help, you can. Proper artwork is on the way - I'm a slacker, and the cutscenes need work. A demo for controllers will be released before the game is released. ...Q: Multiple file upload with asp.net c# issue I am creating multiple file upload functionality with asp.net c#.
