Shadow Complex is one of the best Puzzle-Platformer games ever made. Also one of the most popular. Shadow Complex 2 is pretty much exactly the same game. Same gameplay, same controls, everything! You know the deal. However, it adds some new aspects to the game, for example, two new chapters. You will be able to play this game for 3 more times. Enjoy! And now a quick little comparison between the two games. Shadow Complex is the original game. The second one is Shadow Complex 2. One difference is that the second game has two different endings, with the third ending unlocked upon the completion of the first two. However, the gameplay is the same in both, and you will be able to get all the endings and achievements. You can play Shadow Complex 2 for free for the first ten minutes. After that, the game will cost you $4.99. The gameplay will be exactly the same in both games. I advise you to buy Shadow Complex, since that's the original game. However, you can also just go to the second chapter. System requirements for Shadow Complex 2: OS: Windows XP, Windows Vista, or Windows 7 CPU: i3-3300 @ 3.3 GHz or AMD Athlon XP 2200+ @ 2.4GHz Memory: 4 GB RAM HDD: 20 GB free space Shader model 3.0 Shadow Complex 2: Overview: The Chapter 2 is pretty much exactly the same as Chapter 1, however, there are some slight differences. The key differences are: - You need to find two items to unlock the third chapter.- Two new chapters with a new final boss.- The camera controls are different.- You need to run faster. Anyhow, it's the same game and you can unlock the third chapter at any time. Try to beat the game as fast as you can, and collect all the achievements, and you can play chapter 3 (or 2) for free. Alright, now that

Generator TETRA's Escape Generator provides unique code-generated man-in-the-loop simulation for code testing during pre-flight safety checks of TETRA transmitters. The Escape Generator helps radio carriers ensuring that the central TETRA transmitter performs safe switching of communication procedures, following the method in the TETRA-EC-32 Parts 13, 15 and 16. SIMULATION [X] For code simulation in direct mode only[Q] Enables code simulation for both direct and automatic mode[A] Enables manual switching to automatic mode, placing the Escape Generator next to the transmitter and then pressing Start button[T] Enables auto-mode simulation, the Escape Generator sets the transmission facility to the trunk and the time during the simulation in milliseconds and if already coded as automatic or manual mode.[+/T] Enables the operator to manually switch the transmission facility to Automatic mode and sets the time in milliseconds.[D] If already coded as automatic or manual transmission facility, now sets the time in milliseconds.[R] Manually changes the transmitter manufacturer code (manufacturer code is marked in the top left hand corner of the Escape Generator and can be changed by the operator using the Manual/Manual button)[/R] Manually sets manufacturer code.[] Enables the operator to manually change the type of interrupt communication procedures (number of interrupts, frequency of communication procedure, number of procedure intervalls and periodicity in seconds.
