## WHAT IS Witchfall: Secrets of Emotica??:

- Emoteware is a conceptual product that helps you understand the real world.**
- From what I understand, is with Witchfall: Secrets of Emotica, people can use emotes in chat**
- It's not just for emotes, but you can also use witchfall (not sure about this word) as a general name for emotes/words. For example, I use emoTwilight and emoChu for emotes.**
- These emotes can also be used in-game for a variety of reasons. For example, in this game you can shoot / throw spells to defeat enemies. Instead of doing that by using direct input, you can use emotes like twilight/emotChu or other possibilities.**
- The reason for doing that and the context-of-use could be very different. I could just be shooting spells or doing lore fetching or something else.**
