Composer In 1992 Autodesk developed a professional graphics software called Composer. With the launch of Version 1.0, Composer was named AutoCAD (Autodesk Architectural Desktop). Version 2.0 was released in 1996. With AutoCAD 2000, the software began to be marketed as Autodesk Architectural Desktop and added more functionality. Autodesk Architecture Studio became the name of the Windows version of AutoCAD 2000 when it was added to AutoCAD 2000. In 1999, the company launched AutoCAD 2000 Architectural Design Suite as an add-on for Autodesk Architectural Desktop. ```
export class StringHasTheLengthOf { constructor(public value: string) { } public toString(): string { return "String has the length of " + this.value.length; } } let foo = new StringHasTheLengthOf('foo');
```

 You could do the same thing with a function, but I find classes in JavaScript easier to read. -success">Valid
