Say I have two branches: 1) master 2) feature and commit to the master branch, then I realized the feature isn't ready and want to squash my commits down into one commit, make some tweaks, and then merge the main branch to feature. Is this possible? A: Go to a branch on your master and do a git rebase -i master and add the three commits in your feature branch to the list and commit with a comment. Then go back to your feature branch and do a git merge master A: Yes. You're not going to be able to rebase anything though, as you don't want to start something by merging a branch into master.

You want a cherry-pick. There is an internal git command called cherry-pick that does this. It will copy a commit, and merge the copied commit into the current branch.

Dream Dancers: The Professional Dancers Of Las Vegas Armed with an ever-mutating set of characters, a distinct repertoire, and a disdain for formality, The Dream Dancers have come a long way since the show began in the mid-1990s. They've sustained their implausible jokes, moves and costumes for over two decades, and though the strip club act—its costume, its line of work, and its team of dancers—is incredibly complex, it all comes down to the charm of personalities, the mystique of dance, and the importance of looking cool.

The plastic tray is lined in soft, textured beige fabric with a generous interior pocket, and a removable, accessory-ready back panel of molded plastic will hold up to 6 standard pocket blades. Of course, you also get a handy handle on the tray, so that you have a way to carry your entire kit with you. It is made of durable plastic and measures approximately 17.5" x 8.25" x 3.3". Well, it doesn't hurt to have a fast, economical mechanism for holding and transporting components and tools. The plastic tray is lined in soft, textured beige fabric with a generous interior pocket, and a removable, accessory-ready back panel of molded plastic will hold up to 6 standard pocket blades. Of course, you also get a handy handle on the tray, so that you have a way to carry your entire kit with you. It is made of durable plastic and measures

approximately 17.5â€³ x 8.25â€³ x 3.3â€³. The solid stainless steel blade carrier holds up to 6 16-inch retractable blades and features a removable paddle for ensuring proper alignment of the blades. This blade carrier will also come with an 8-inch plastic swivel carrying tray with 5 side pockets and a large central pocket, a prying tool, a sidecarrier tool, a multi-tool, and an optional front pocket blade. The metal rack, measuring 24â€³ x 6â€³ x 1.25â€³ holds 7 6-inch retractable blades. The tool sleeve has a convenient cross handle for carrying other tools and accessories, such as 4-inch plastic pry tools, scissors, punches, and much more. The lid opens in a radial fashion and slides on the bottom, and the tray is designed with a center of gravity that will allow for easy transportation of the items in the kit. The manufacturing process for the carrying tray, blade carrier, metal rack, and tool sleeve is done in Taiwan. The lid is designed to allow for quick access to the blades that are on the metal rack, and the interior of the tray will be lined with soft, textured fabric, which will provide
