Looking back at the past is a key factor for the consciousness of today. But are we aware of the past that we are looking at? This question is asked the author of „Lover“, Philippe Vauthier in his collective story „Vanhoool Story“. The story begins in 1945 with the imprisonment of the German ambassador. The next time VanHool company owner Pierre Houanard finds the suitcase with the contents of the German ambassador in his garage. Thus the VanHool Story commences. With the help of his team, Mr. Houanard scours the globe to create what is considered the most beautiful vans. But of course he has to deal with the political and military regime that controls him. However, also because of this this regime, the VanHool company achieves many firsts and is even sent to the Olympic Games in Helsinki. After the story of the „Vanhoool Story“, the author decided to expand his work a step further. He decided to focus on the not so well-known cars of the VanHool and find out in which details these vehicles differ. Therefore, the overall work „Vanhoool Discovery“ was created. While this was going on, the start of the war was approaching. The end for VanHool Story and discovery was clear. But Houanard wanted to create something extraordinary in an extraordinary time. And although the end of the war came, the end of this conflict did not. So Mr. Houanard created the VanHool „Generation Series“. The „Generation Series“ encompasses four works in total. Starting with the „Generation Series – Part 1“ and ending in „Generation Series – Part 4“. All of them are stories that in a very small way try to describe the life of Mr. Houanard. And they are telling which has happened in the life of an artist. The „Generation Series“ are therefore divided into 3 parts; „VanHool Story“, „VanHool Discovery“ and „Vanhoool Generationen Reihe“. Where does the name come from? The name „Generation Series“ originated from a nice story. While searching for a place where to make a work, to finish his story „Vanhoool Story“, Mr. Houanard went to a small village called „c9d1549cdd

in the Brotherhood's Diplomacy with Washington A top Brotherhood leader tells me the movement has been left with no choice but to alienate itself in order to seem moderate... Mohamed El-Beltagy, a strategist and Egypt political analyst, is a former senior member of the Brotherhood's Freedom and Justice Party. (Pablo Martinez Monsivais / Associated Press) Karen DeYoung - April 9, 2013 In Spring 2011, as Egypt teetered on the brink of revolution, there was probably no question whose side the Brotherhood would be on. With the army in power, the Muslim Brotherhood had been a bulwark of stability for years. In 1934, the year of its inception, it had won nearly one-third of parliamentary seats in a popular vote for the presidency, which it alone had won. But not long after the revolution that came to be called the Jan. 25 "revolution" began, that had begun to change as it became more clear that the army's leadership was going to have a very different mandate than that to which most Egyptians had grown accustomed. When the elected Constituent Assembly drafted a Constitution for Egypt in December 2011, it revealed a very different country than the one that had been running it for more than two years. What had been a consensus of government, even of the Islamists, had been upset. Both the Brotherhood, the most powerful Islamist group, and the outside experts that represented Egypt to the world were unprepared for how profoundly they had been thrown off balance. The challenge to the Islamists emerged at the very moment, after the fall of Hosni Mubarak, when Ahmed Sha'rawi, the Brotherhood's political strategist, and his top deputies were exhausting all means for urging the Islamist party to accept the growing authority of the army. Instead, they urged the Brotherhood to step back from that possible, bloody confrontation. The strategy finally was embraced on Feb. 7, 2012, when President Mohammed Morsi issued a constitutional declaration preserving most of Mubarak's Constitution. Morsi's gambit did not work, and it ended with his removal by the military a month later. In the backlash that followed, Brotherhood membership dropped precipitously, though the government continued to call it by that name for a time after the overthrow of Morsi, and by others as well. President Mohamed Morsi's removal from office sparked

And someone with the talent and DNA to play an apt character like a hulking James Bond. But then things got interesting. An armored car arrived with a much larger bomb. A menacing ring of men were assigned to patrol the area. It was a scene straight out of a movie — or a dystopic nightmare. The tone of an event intended to contrast Walmart's policy of no ammunition sales on its vast Black Friday website was set when authorities began rounding up demonstrators and detaining a news reporter. A protester was charged with rioting and assault on the officers just blocks from the White House. All that was missing were an
