The Blind Of The New World is a visual novel by award-winning visual novel author Kil-ke (formerly known as Kill Rose), who has produced some of the most critically acclaimed visual novel games in Korea. A fantastic story and a unique environment set against the backdrop of Korea's fascinating 20th century history. The game's genre, "Orphans no Wana," is an action-adventure, time travel story where decisions made throughout the game affect the future flow of events and have repercussions. Based on the 17th century life of Kim Myung-woo (a Korean statesman, minister and diplomat), the plot sets out in a timeline starting from 1900 and moves forward to the year 2000. In this world, the Electron Cornea was an invention that blended the virtual and physical reality. This meant the invention and birth of augmented reality, and the beginning of a world shaped by visual perception. But for one young boy with 'blindness', a bizarre change is set in motion. The protagonist, one-time traditional school girl Ayaka, seeks to avenge the past from behind a screen of motion. Become one of the blind as you live through this story with our protagonist and his classical-minded heroine. - High-end Tech - Full-body regen - Energy upgrades - Realistic animations - Photography mode It's Time to Take Up the Helm!
