In the console, run the KeyGen.bat file with admin rights. This will generate a copy of the file HKLM\Software\Autodesk\Autocad\2016\ACad16\SubstituteProperties key in the current user's registry hive and add an entry named 2016\2018-SubstituteProperties. This will allow you to replace the file if the software is not activated correctly and also allows you to replace only the SubString portion of the original file. The folder name 2016 in this example is a convention only and will be replaced with the latest version by the file. When you start the software, the screen will show the last time the software was activated, which is the version that you downloaded. If you have not activated it, the screen will show the date you downloaded the software. In this example, the new version (2018) has been activated by the file 2016\2018-SubstituteProperties. You can now open the document and notice that the substitution has been applied. If the last time the software was activated was more than 10 days ago, you may see the message "This file is more than 10 days old" and will need to reactivate it. The next step You can continue to use the old version of the software as you normally would. The differences between the two files Since both files are being read into memory, you can use any tool to determine the differences between the two files. I used Notepad++ and the following information was read into the first file. The first file is the version of the software that I downloaded and installed on May 8, 2016. The second file is the version of the software that was activated on July 3, 2016. The following table shows the differences between the two files. As you can see, no changes have been made to the file. I simply activated the new version and activated the old version by creating a new file. It is important to note that the files are different because the software is intended to be used with newer versions. If you install an older version of the software, the changes will not apply to the older versions. Hopefully this article will save you time, and if you have any questions, please contact me.
