Both games have new missions and new units, as well as many new general features.Q: Linux service is running, but failing to connect to MySQL I have a custom Linux service (a payment gateway) running on a remote server that I recently created. It starts up fine by itself, and a few days ago started spitting out the errors shown below. The service executes fine if run by root, but errors if run by a non-root user (even though the MySQL user I created during installation is listed as one of the many administrators in my MySQL config file for that database). From what I've read, I think this is because the service that is executing 6d1f23a050
