A: Make sure you are using the correct version of the dictionary (dictionary.dic). If you're still not getting an error, you're probably just missing a case-sensitive linefeed. Try checking if this works: \$cat file.txt | od -c | grep "19\$" If so, check that you aren't accidentally including leading or trailing spaces in the text, or check that your case isn't being changed between your edit and your output. If you still can't get it to work, please file a bug in your language's bug tracker with the details. Percutaneous coronary intervention in patients with severe aortic stenosis: long-term follow-up of all-cause mortality and severe cardiac events. Severe aortic stenosis (AS) is associated with high rates of cardiovascular morbidity and mortality. Percutaneous coronary intervention (PCI) in these patients is associated with an increased risk of stroke and other major adverse cardiac and cerebrovascular events. The incidence of these events and their impact on all-cause and cardiac mortality have not been previously reported. The purpose of the study was to assess long-term follow-up of all-cause and cardiac mortality in patients with severe aortic stenosis treated with PCI versus optimal medical therapy (OMT) and the impact of PCI on these outcomes. Patients with severe AS treated with PCI c6a93da74d
